SUMMARY

Passionate Software Engineer with expertise in the MERN stack, NextJS and Cloud DevOps. Eager to apply my skills in frontend and backend engineering. Proficient in React.js, Node.js, Express.js, MongoDB, and NextJS, with a strong foundation in REST APIs, Firebase, Supabase and scalable application development.

SKILLS

Frontend: ReactJS, React Redux, NextJS, HTML, CSS, JS, Bootstrap, Tailwind.css

Backend & Database: Node, Express, MongoDB, SQL, RESTful API

Programming & Problem Solving: Data Structures & Algorithms, Debugging, Leetcode 120+

Cloud & DevOps: AWS (EC2, S3, Lambda, ECS), Docker, CI/CD, Containerization

Tools & Platforms: Git & GitHub, Postman, Netlify, Vercel, Firebase, Supabase, Cloudinary, PayPal, Stripe

EDUCATION

Bachelors in Computer Science, University of Education, Township Lahore Pakistan (GPA: CGPA: 3.2) Lahore, Pakistan

PROJECTS

Shop Nest [Link](#)

Sep '25

- A comprehensive multi-vendor e-commerce marketplace supporting sellers and buyers with real-time interaction and secure payments.
 - Supports product catalog with advanced filtering, shopping cart, wishlist, order tracking, and review system.
 - Seller dashboards with analytics, coupon/discount management, and real-time messaging via Socket.io.
 - Integrated Stripe & PayPal for secure payment processing and Cloudinary for optimized media storage.
 - Role-based authentication & authorization with JWT and Bcrypt.
- Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, Socket.io, Stripe, PayPal, Cloudinary, JWT, Bcrypt

Shaheen Real Estate [Link](#)

Jun '25

- Developed a real estate listing platform that allows users to create, view, update, and delete property listings.
- Implemented secure user authentication and authorization using Firebase, and integrated Supabase for cloud image storage and management.
- Utilized React for responsive UI, Node.js and Express for backend APIs, and MongoDB for storing user and listing data.
- Added advanced features including image upload with preview and delete options, form validation, protected routes, and cookie-based JWT authentication.
- Emphasized scalable design and mobile-first responsiveness.

Social Media [Link](#)

Jul '25

- Built a social media platform that enables users to register, create and delete posts, like and manage friend connections.
- Utilized Redux Toolkit for efficient and scalable state management across authentication, posts, and user interactions.
- Designed a clean, responsive, and professional UI using Material UI (MUI) for consistent layout and styling.
- Developed RESTful APIs using Node.js and Express, and implemented MongoDB for backend data storage.
- Integrated JWT-based authentication for secure access, with frontend deployed via Netlify and backend services via Vercel, emphasizing performance and scalability.

EXPERIENCE

Technical Trainer

Remote Nov '25 — Present

After Query

Developed and engineered a high-performance Minimum Viable Product (MVP) using the MERN stack and Next.js, transforming a core product concept into a functional, production-ready web application.

Technical Trainer

Jul '25 — Present

Dev Weekends

- Mentored students in **software engineering concepts**, including algorithms, OOP, and clean code practices.
- Conducted **technical sessions and guided projects** as part of the Dev Weekends community of 20,000+ developers.

VOLUNTEERING

Ambassador, UET Science Society

Present

Operation Lead, Black Box AI UE Chapter

Present

Registration Lead, Tech karwan

As the **Registration Lead** for **Tech Kaarwan**, a university-level coding competition, I managed the entire registration process and coordinated participant data. I ensured smooth communication, team coordination, and successful event execution.
